問1 次の英文を和訳しなさい。

Dance is a form of non-verbal communication that transcends language barriers, allowing people to feel and understand one another through bodily expression. Particularly in creative dance, unlike sports, it is a "goal-free" activity with no fixed rules or winners, offering the freedom to express oneself guided by emotion and intellect. Diverse ways of engaging with dance, such as dancing, creating, and spectating, continue to evolve and expand in response to the changing times.

問2 次の英文を和訳しなさい。

Japan has made remarkable strides in population health, emerging as one of the world's leading nations in longevity. However, Japan's health gains over the past 30 years are now stalling, with rising regional disparities. The increasing burdens of Alzheimer's disease and other dementias and diabetes, alongside high fasting plasma glucose and high BMI, highlight areas needing focused attention and action.
